Enjoy the look of natural stone with Kilimanjaro tiles from CTM

**R**uggedly and arrestingly beautiful, the landscapes of Africa have long provided inspiration for artists, designers and craftsmen. Timeless and durable, the natural materials of slate, rock and sandstone make striking decor elements in the home, too.

With Kilimanjaro Rock, the new range of tiles from CTM, you can bring the look of natural stone into your home or outdoor areas – they're easy to install and effortless to maintain. Each highly compact, extruded Kilimanjaro tile has been meticulously crafted in ceramic, making it tougher than granite, so you'll be able to enjoy its natural look for many years to come. It also needs no special sealing treatment or upkeep, and, because it's completely liquid-resistant, you can relax in the knowledge that your tiles won't stain or discolour.
