

Feel-good flooring

The new range of Elf laminated flooring from CTM looks natural, is kind to the environment, warm and welcoming – and feels fantastic underfoot.

Laminated wood flooring is a durable, attractive floorcovering that lasts, and a wonderful way to create a welcoming atmosphere in your home by adding warmth and colour.

Elf Naturals is CTM's first range of laminated wood flooring, and has been developed specifically to provide a warm, natural look. CTM sourced the best ranges from top international manufacturers, to bring you real value for money.

Elf Naturals' comprehensive range offers you a choice of 16 colours and finishes including Bushveld Acacia, Cape Stinkwood, Limpopo Acacia, English Oak, Brazilian Walnut, Burmese Teak, Hawaiian Cedar and Indonesian Mahogany.

These floors are resistant to wearing, stains, burn marks, impact and fading.

Easy to clean and to maintain over time, they are hygienic and anti-allergenic, environmentally friendly and quick and easy to install. Available in 7mm- and 8mm-thick options, they're guaranteed for 15 and 20 years, respectively – each product undergoes stringent testing and CTM endorses the factory guarantee with one of their own.

The 7mm option is suitable for moderate to intensive domestic use (anywhere in the home), or occasional to moderate commercial use (small offices). The 8mm option is suitable for intensive domestic use (busy living areas), or moderate commercial use (guesthouses or hotel rooms).
