

A study in effortless style

Since we can't all afford to update our interiors every few years, CTM introduces Studio Ceramico – a range of designer tiles that transcends change.

Curtis Inspired by limestone with delicate specks on a satin finish, this range has an advantage over natural limestone, as it's non-absorbent.

Easy to install and of the highest quality, Studio Ceramico tiles remain the durable and affordable option when it comes to tiling.

Timeless in design and style, offering enhanced colour options and providing greater versatility, Studio Ceramico tiles are designed to meet your expectations – while giving you the opportunity to access international designs.

With a variety of ranges to choose from, you are sure to find the perfect tile for your interior finishes that will give you lasting satisfaction.

Renovating your home is exciting, but deciding on which tiles to go for can prove to be a challenging creative process. CTM has the solution with Studio Ceramico, the leader in tile design and manufacturing. Their knowledge of global trends, combined with insights from leading designers, inspired them to create tiles spanning a range of different design trends. So you can choose from tiles with a classical or modern edge – and each range combines a different element to suit your décor needs:

- **Tranquility** Inspired by natural rock formations of slate, marble, granite and sandstone, this range comprises a neutral tile with a natural, silky feel easily mistaken for marble; and the beige and ivory tiles offer a warm backdrop for a variety of décor styles.

Tranquility range
